

Course: Linear Algebra
Date:

Quiz : 2

Total Time (Minutes): 8

Total Marks: 8

Course Instructor
Abdul Hafiz Sheikh

Name: _____ Roll No: _____ Section: _____

✓ If $\forall u, v \in V$, $u+v = (u_1+v_1+1, u_2+v_2+1)$

Then 0 of V is $(-1, -1)$.

✓ If $f = \cos^2 x$ and $g = \sin^2 x$, then write 3 as linear combination of f and g .

$$\boxed{3 = 3f + 3g} \Rightarrow 3 = 3\cos^2 x + 3\sin^2 x$$

✓ A finite set that contains 0 is linearly -----

independent ✓ dependent . none

✓ The linear system $AX = 0$ has trivial solution if and only if $\det(A)$ -----

• $= 0$

✓ $\neq 0$

• both

Good Luck!
